

Legacy Intermediate (Template) Workbook: Weekly Refresh and Manual Handoff Layer

How to Improve:

This intermediate workbook will be eliminated entirely in the redesigned solution. Snapshot retrieval, refreshed source comparison, formatting logic, and user-facing dashboard behavior will be consolidated into the Final workbook, removing multiple manual handoff steps from the weekly process.

Improvements Goals:

- Eliminated an entire intermediate workbook
- Removed manual copy/paste handoff
- Folded snapshot comparison logic directly into the final workbook
- Reduced redundant shaping layers
- Improved automation and maintainability
